

# SHOCKWAVE THERAPY

.....

Now featuring  
**NEW CUTTING-EDGE TECHNOLOGY** to get  
you out of pain!

## What is Shockwave?

.....

Shockwave therapy offers an effective, non-invasive SOUND approach to restoring painless mobility in patients with chronic and acute musculoskeletal conditions. Our innovative focused shockwave equipment utilizes the science of sound waves (AWT) to help repair, restore and rejuvenate muscle tissue, especially where conventional treatments were unsuccessful.

## What are Focused Shockwaves?

.....

Focused extracorporeal shockwaves are able to deliver more energy and penetrate deeper into the tissue—up to 5 inches! It is ideal for treating tendon, muscle and bone.

## The Benefits

.....

Receiving shockwave therapy as part of your treatment plan provides game-changing benefits:

- Improved local blood circulation
- Fast pain relief
- Accelerated healing times
- No required medication or anesthesia
- Shorter recovery time—Great for athletes!
- Over 80% report successful outcomes

# Conditions Treated with AWT

- Carpel Tunnel Syndrome
- De Quervain's Tenosynovitis

## MUSCLE SPRAINS/STRAINS

- Calf Strain
- Hamstring Strain

"I am 69 and have had a very painful condition with my knees since I was 62. After my first treatment, I felt instant relief. Not only have I experienced this for myself, but I have seen many of my husband's patients receive successful results."

-Beverly Henry, Destin, FL

"One of the most exciting patient treatments to come along in years!"

-Joe W. Johnson, D.C. Paxton, FL

## Contact

## The Treatment

Following an examination, your doctor will determine which treatment strength and how many sessions are right for your condition. The number of treatment sessions needed are based on the assessment and treatment plan given by your doctor. This therapy is fast, safe, and effective, and the best part of all you can resume your daily activities as soon as possible with little-to-no downtime.

**IF YOU ARE INTERESTED IN THIS NONINVASIVE TREATMENT TO GET YOU OUT OF PAIN FASTER, ASK YOUR DOCTOR IF RADIAL PRESSURE WAVE THERAPY IS RIGHT FOR YOU!**
